Benefits of SNOO Baby Bassinet
SNOO’s womb-like rocking, all-night white noise, and snug embrace of a safe swaddle is specially designed to calm fussing, reduce night waking, and improve sleep. In fact, SNOO has been shown to add 1 to 2 hours of baby sleep each night. And thanks to SNOO’s secure swaddle, which prevents dangerous rolling, parents rest easy. In short, SNOO:

- Securely swaddles Baby on the back to prevent rolling to an unsafe sleep position. Triggers the innate calming reflex, which is Baby’s “off switch” for crying and “on switch” for sleep.
 - Adds roughly 1 to 2 hours sleep each night. And most SNOO babies sleep 9 hours or more by 2 to 3 months.
 - Automatically responds and adjusts to your baby’s fussing with motion and sound, often calming babies in under a minute.
 - Reduces the need for sleep training. SNOO’s weaning mode allows for a gentle transition to crib.
 - Lessens parental stress. Research has shown that SNOO can help moms feel more rested and less likely to feel mentally stressed.
- Chiudi
