Our set of fence panels can be used as a garden barrier or a fence for the living area for privacy and safety.

These WPC fences have a wood pattern on one side and a regular one on the other, so you can choose the design that you like the most. Our wood and plastic composite panel does not require any additional processing, such as oil or paint coating. It is very durable and resistant to rotting and rust. Due to the top profile made of aluminum, the boards of the fence can be securely connected to each other, thereby increasing their rigidity and impact resistance. The modular system ensures that the boards for the fence are easy to install and allow you to comfortably extend the fence. These pillars have three openings that allow you to install the fence in different ways, for example, in a straight line (180 degrees), at a straight angle (90 degrees) or in the form of a T. The presentation includes 36 WPC panels, 5 poles and 4 aluminum rods.

This set of fences is easy to assemble. Chiudi
