This universal, movable cosmetological chair is perfect for use in a professional salon or just at home.

The cosmetological chair is upholstered in comfortable, durable and soft artificial leather. It is easy to clean and resistant to creams or massage oils. Steel construction and wooden frame give the beautician bed strength and durability. The backrest and footrest can be easily lowered to a maximum angle of 45°, thus providing optimal sitting and lying comfort. The head cushion and armrests are removable. A transport bag is also included in the presentation, thanks to which you can take this movable chair with you on trips.

This cosmetological chair is easy to assemble. Chiudi
