

An architectural rendering of a modern residential building. The house features a mix of white and dark brown exterior panels. It has large, irregularly placed windows and a prominent cantilevered upper floor. A red brick driveway leads to a two-car garage. A silver car is parked on the left side of the driveway. The property is bordered by a low concrete wall and a black metal fence. Green lawns and trees are visible in the background and foreground.

Le pareti portanti son in ISOSPAN ossia blocchi di legno d'abete macinato e mischiato con cemento, ossido di ferro ed acqua per garantire ottime prestazioni meccaniche e termiche. Il prodotto finale sarà sia antisismico che resistente al fuoco ,garantirà l'isolamento da caldo, freddo e rumore permettendo al contempo un'ottima traspirazione.
