EMUFDD - Network floppy disk drive emulatore & simulatore

EMUFDD ("Emulator of Floppy Disk Drive") is a specific technology to emulate any kind of floppy disk drive, 8"/5.25"/3.5". Data is stored on an internal FRAM buffer that behaves like a hard disk, no data loss at power down. Robust TCP/IP networking, 80x faster than serial RS232, and industrial grade communication with an unlimited number of distributed PCs. Safety emulation/networking interlock and retransmission ensure reliable data exchange under any circumstances. Text scripting support is included for seamless DNC integration. In case of "network down", an additional and fully-functional USB port is also available. No preventive maintenance is necessary because of the unique 20 years data retention warranty.

EMUFDD ("Emulator of Floppy Disk Drive") è una tecnologia specifica per emulare ogni tipo di floppy disk drive, 8"/5.25"/3.5". I dati sono salvati su un buffer FRAM interno che si comporta come un hard disk, nessuna perdita di dati allo spegnimento. Rete TCP/IP robusta, 80x più veloce di una seriale RS232, e comunicazione industrial grade con un numero illimitato di PC distribuiti. Interlock di sicurezza di emulazione/rete e ritrasmissione assicurano uno scambio dati affidabile in qualsiasi condizione. È incluso il supporto per lo scripting testuale per una perfetta integrazione DNC. In caso di "inattività di rete", una porta USB aggiuntiva e completamente funzionale è ulteriormente disponibile. Non è necessaria alcuna manutenzione preventiva grazie alla garanzia unica di 20 anni di conservazione dei dati.
