Journal of Diabetic Foot and Ankle Case Reports published Case Reports in Diabetic Foot, Case Reports in Diabetic Ankle, Case Reports of Diabetic Foot and Ankle, Case Series of Diabetic Foot and Ankle Case Reports Journal, Clinical Images of Diabetic Foot and Ankle etc. Diabetic Foot and Ankle: Foot infections are the most common problem in diabetic patients.

Diabetic patients are predisposed to foot infections, due to their compromised vascular supply to diabetes. Certain conditions like local trauma or pressure, along with the presence of micro vascular disease, results in various diabetic foot infections from simple superficial cellulitis to chronic osteomyelitis.

Authors can submit their manuscripts through the journal's online submission portal and For more information on Oxford City Publishers - Ankle Case Reports Journal visit our site:-
