STARLINE La qualità dei dischi freno è pienamente comparabile con i prodotti di marca. Soddisfano i requisiti di tutte le relative norme europee. Anche in caso di estremi carichi la loro forma rimane stabile.

Il trattamento della superficie dei dischi garantisce il massimo effetto frenante immediatamente dopo il montaggio. Le pastiglie freno sono state prodotte con l'impiego materiali di altissima qualità; al loro collaudo precede una serie di test e di prove di laboratorio - frenatura su veicolo, analisi delle caratteristiche d'attrito e di quelle meccaniche, l'analisi della stabilità di velocità e di pressione - sia in condizioni d'uso normali che in quelle difficili. Per il trattamento superficiale delle pastiglie è stata impiegata la tecnologia di scorching (a temperatura di 900 C le particelle organiche delle guarnizioni del freno vengono bruciate, al fine di eliminare il rischio di eccessiva lucidatura della superficie durante il

rodaggio, e anche per eliminare il cd. gasplanning Con i dischi freno originali ATE puoi stare tranquillo: i dischi stessi sono di qualità superiore al primo approvvigionamento e resistono alle più dure condizioni di uso.

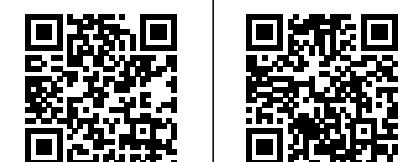

La durata dei materiali è di 100.000 km e le performance sonoinali, ad un costo inferiore al veicolo vengono fatto un prezzo produttivo. La nostra esperienza e la nostra passione per la qualità ci permettono di raggiungere una qualità superiore. ATE offre una gamma aziendale completa di dischi e pastiglie per le vetture più esigenti.

introdurre freni a disco ad alto contenuto di carbonio perché garantiscono una migliore condutività termica. Si evita così che nel disco freno si deformi lateralmente o sia eroso da pastiglie troppo aggressive.
