Nikon F801s sold together with Nikkor AF 35-135mm F3.5-F4.5 AF Micro
The camera has been tested with film and it is working correctly however it is sold "as it is"
Main camera features:
A Depth of Field preview button allows temporary stopping down to the shooting aperture to check DOF.
A Multiple Exposure facility allows up to nine shots within one frame.
A unique 'two shot' self-timer. This allowed a second shot to be taken by the self-timer a couple of seconds after the first, giving a more 'relaxed' and unposed picture.
Fully programmed automatic exposure, Aperture priority, Shutter priority and fully manual exposure control.
30-second to 1/8000-second shutter speed range with bulb mode.
Film-speed setting from DX code or by manual override (ISO 6 to 6400).
1/250-sec. flash synchronisation.
Evaluative 2D Matrix and 75% Centre-Weighted Average metering modes.

The camera is compatible with all Nikon lenses with aperture ring (up to AF-D not compatible with G series)
Excellent camera, high performance, semiprofessional version of the F4 Chiudi
