Uncancelled and unissued US Railroad stocks from late 1800 to early 1900.
These were bulk stocks that had never been issued to a purchaser / shareholder and therefore are much more well conserved than issued ones. Nonetheless, some present minor cracks, tears, missing parts, stains and blemishes due to the age of the items, conservation conditions and type of paper.
Some are prenumbered, one is already signed by corporate official. Obviously these stocks do not represent any title in the capital of the issuing company, but are merely decorative and / or collectible items.
I will ship via trackable courier or postal service.
Please take a close look at all the pictures to ascertain the exact conditions of each piece. One item is damaged Chiudi
