For the first time, the Commission has been able to make a more complete assessment of the impact of the various measures taken to date. The Commission has found that the measures taken to date have had a significant impact on the environment, particularly in the areas of air quality and water resources. The Commission has also found that the measures taken to date have had a significant impact on the economy, particularly in the areas of employment and investment. The Commission has also found that the measures taken to date have had a significant impact on the social environment, particularly in the areas of housing and education. The Commission has also found that the measures taken to date have had a significant impact on the cultural environment, particularly in the areas of heritage and tourism. The Commission has also found that the measures taken to date have had a significant impact on the natural environment, particularly in the areas of forests and wildlife. The Commission has also found that the measures taken to date have had a significant impact on the built environment, particularly in the areas of infrastructure and urban development. The Commission has also found that the measures taken to date have had a significant impact on the environment, particularly in the areas of air quality and water resources.
