Super RARE Eko 295 original redburst
VERY RARE GUITAR OUT OF PRODUCTION FOR ABOUT 9 YEARS.
REISSUE OF THE MYTHICAL 295 YEARS OF THE 60S...
PRACTICALLY LIKE NEW CONDITION
Simply unique!!!! This instrument is the rarest and most original that EKO has produced! It is the result of the development of the 700 in the archtop version. This instrument, made in a few examples in 1964, has been recreated with a more comfortable neck and vintage-style pick ups to enhance its tonal characteristics. The original aesthetics of the triple cutway and the hollow body make this instrument particularly suitable for jazz sounds, both classic and combined with a slight over drive for more fusion applications. But the bold shape and the asymmetrical characteristic of the case allow for uses that are totally different from jazz, in fact a very important characteristic is that the instrument manages to work well even with very saturated sounds, therefore it can open up to more experimental solutions in the grunge or modern context rock. - Body: Semi-acoustic carved - Neck: Maple - Pick Up: 2 ??EKO Vintage 60's Humb - Scale: 630 - Bridge: Tailpieces - Controls: 1V, 2T, 3way pick ups switch Chiudi
