Sasquatch - Sulle orme della gigantesca creatura delle Montagne Rocciose

Nel West canadese, tra le Montagne Rocciose e il Pacifico, un essere sconosciuto alla scienza sta lasciando le sue impronte gigantesche: forse un umanoide non classificato dagli antropologi, forse un residuo della preistoria sopravvissuto in qualche misteriosa nicchia ecologica.

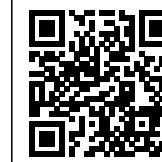

Non è un orso perché le sue impronte sono di piede umano; non appartiene alle scimmie perché è un bipede completo, onnivoro notturno..
