in excellent condition, practically new. with original box, original case and original manuals. fully functional. \r

The Contax Tix was a super expensive 'boutique' APS film camera, released around 1997. I doubt there were many (or any) more expensive APS cameras than this one.

The Contax Tix is a subcompact film camera and uses APS film. \r

Name; Contax Tix, silver or black.\r

Manufactured by; Kyocera Corporation, Japan.\r

Production date; ca1997, made in Japan.\r

Price; originally about \$999, or 120,000 yen.\r

Focusing on

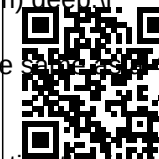

comparative analysis of the two cameras. The results show that the Zeiss camera is more accurate than the APS camera in most cases, especially in the measurement of the distance between the two points. The Zeiss camera also has a higher resolution and a better image quality. The APS camera is more expensive and has a larger size. The Zeiss camera is a better choice for most applications.
