2 volumi in-4 (26x20 cm), pp. (12), 496; pp.497-1105, (6). Legatura coeva piena pelle, dorso ornato. Illustrati da incisioni in rame in tavole riegate f. testo: una grande carta geografica con il planisfero di tre continenti (America, Asia, Africa); 31 tavole schematiche su varie materie, tecniche, scientifiche, naturalistiche, astronomiche, matematiche, etc. etc.

Prima edizione di vasta opera che riunisce le conoscenze del mondo scientifico sino a metà XVIII secolo. Thomas Rutherford (Cambridge 1712-1771) fu personaggio assai evidente in campo religioso e di scienza, eletto Fellow of the Royal Society e Member of Gentlemen's Society at Spalding, docente di scienze fisiche nella sua città. Il presente suo vasto trattato è molto raro, descritto da poche bibliografie generali o specialistiche. Esemplare con piatti staccati e difetti ai dorsi. Interno in ottimo stato, per questo i volumi sono meritevoli di un restauro alla legatura.
